

Cooling scene

A misty vapor flows out of a giant culvert used as a creative waterfeature at the entry of the four-acre Water Conservation Garden at Cuyamaca College in El Cajon. Decorative boulders and river rock surround the shallow pond. *Dietes iridioides* hug the water's edge with their sulfur-yellow blooms. This superb educational garden specializes in water-wise landscaping and helps visitors learn how to create a beautiful California-friendly landscape. For more information, visit www.thegarden.org.
